PROFESSIONAL SUMMARY

Computer Science Engineering student at Dr. A.P.J. Abdul Kalam Technical University with strong interests in Artificial Intelligence, Backend Development, and Full-Stack Web Development. Passionate about building practical AI-powered systems that solve real-world problems.

Experienced in developing AI-integrated applications, REST APIs, browser extensions, and developer tools. Skilled in Python, JavaScript, FastAPI, Node.js, and modern AI model integrations. Seeking internship opportunities to gain hands-on industry experience and contribute to impactful technology projects.

EDUCATION

Dr. A.P.J. Abdul Kalam Technical University

Bachelor of Technology (B.Tech) – Computer Science Engineering
2024 – 2028

New R. S. J. Public School

School Education

TECHNICAL SKILLS

Programming Languages

Python, JavaScript, C, HTML, CSS

Frameworks & Technologies

FastAPI, Node.js, Express.js, React.js, REST APIs

AI & Development

LLM Integration, Prompt Engineering, AI API Integration, Backend Development, Chrome Extension Development

Tools & Platforms

Git & GitHub, OpenRouter API, Groq API, Gemini API, VS Code

PROJECTS

CodeMentor AI — AI-Powered Code Review & Interview Preparation Platform

- Built a full-stack AI coding assistant platform that analyzes code, explains logic, detects bugs, suggests optimizations, and generates interview questions.

- Developed backend APIs using Python and FastAPI with modular architecture for scalability and maintainability.
- Integrated multiple AI providers including OpenRouter, Groq, and Gemini APIs with fallback handling mechanisms.
- Implemented features such as code explanation, optimization suggestions, debugging assistance, and AI-powered coding chatbot support.
- Designed interactive frontend workflows with expandable side panels and structured rendering for technical outputs.
- Improved developer workflow by combining AI-based code analysis and interview preparation into a single platform.

TrustLens Pro — AI Deepfake & Misinformation Detection Extension

- Developed an AI-powered Chrome Extension for detecting misinformation and manipulated digital content.
- Integrated LLM-based forensic analysis systems for real-time auditing of online media.
- Worked on browser extension architecture, backend API integration, and AI implementation workflows.
- Focused on improving digital trust and helping users identify AI-generated or misleading content.

CERTIFICATIONS

- Kaggle Certification – Introduction to Machine Learning
- Node.js Bootcamp – LetsUpgrade
- Critical Thinking in the AI Era – HP Certified
- Python Essentials 1 – Cisco

CORE STRENGTHS

Problem Solving • Backend Development • API Integration • AI Application Development • Full-Stack Development • Fast Learning Ability • Team Collaboration

INTERESTS

Artificial Intelligence • Backend Engineering • Full-Stack Development • AI Tools & Automation • Developer Platforms • Badminton • Traveling & Exploration
